Tangerang Selatan, Indonesia

As a 5th-semester Binus University student passionate about web development, I've honed my skills in HTML, CSS, and JavaScript through various projects. My dedication to seamless, interactive user experiences is evident in the front-end websites and applications I've developed. Leading the Visualization division for a major student association event, which drew 800 participants, enhanced my teamwork and problem-solving abilities. I'm eager to bring my enthusiasm and expertise to a dynamic team and contribute to innovative projects.

Education

BINUS UNIVERSITY

2022 - Present
